Message from the President

This Automotive Industry Economic Impact Study was conducted to show the significant contribution Georgia franchised automobile dealers makes to the Georgia economy. Dealers provide tens of thousands of jobs to Georgia residents, and are an important component of the state's economy. Dealers are and should be very proud of their contributions to statewide economic growth and development. This Study illustrates how deeply entrenched automobile dealers are and have been in every aspect of Georgia's economy, including employment, payroll and taxes, sales, advertising, charitable contributions and more.

In this post-pandemic world, it is more clear than ever before that personal vehicles and personal transportation are vital to our everyday lives. The roles automobile dealers and dealership employees play in providing and maintaining reliable personal transportation to us all is crucial. And now, as we enter into the newest advancements in personal transportation- electric vehicles- dealers remain committed to selling and servicing these vehicles and providing a robust and competitive market for consumers.

BACKGROUND AND METHODOLOGY

Dealership financial data (and other information cited in the report) was collected from a detailed survey sent to all new vehicle automotive retailers in Georgia. Economic impact is separated into two main categories: direct and indirect. Direct impact comprises economic activity at automotive dealerships themselves, such as dealership employment and compensation to employees. Indirect impact occurs away from the dealership, and takes into account the extended contribution dealerships and their employees make to the Georgia economy.

The indirect economic impact of automotive retailers was estimated by Auto Outlook, Inc. Estimates were based on previous impact studies that relied upon regional input-output economic computer models. Indirect economic estimates in this report are intentionally conservative, and therefore, may underestimate the overall contribution automotive retailers make to the Georgia economy.

Auto Outlook, Inc. is a regional automotive market analysis firm providing market research services to automotive dealers. **Jeffrey Foltz, President**
